

NOTICE To Parents Regarding: Lost and Found Services For Students

Great News For Parents and Students!

"Owner Contact Service" now provides a **NEW** way for **schools to return lost items to students!**

Students often lose items on school grounds, which are usually turned into *lost & found*. However, due to the lack of any identification, school personnel and lost & found, have no way of determining which students the lost items belong to. Now there's a **NEW** way for any school official or lost & found department to immediately determine the owner of any lost item, simply by going to the website shown on the **special Coded Tag** and entering the student's unique **"Owner Contact Code"** also shown on the tag. Schools can then quickly return lost items to their rightful owners. **The Tags** can be used for returning lost cell phones, ipods, laptops, backpacks, keys, books and other items. If an item is found off campus, anyone can use the online search form or call the **toll free** number on the tag and have the system operator contact either the student or a parent by phone, or send an email through the automated system. Parents or students can also call the operator to check if their item has been found and where it can be retrieved. **Student information is secure and personal email addresses remain private at all times.**

In addition to helping schools return lost items to their students and parents, the service also includes a **School Fundraiser**, which allows schools to earn **20% recurring** commissions on each parent's annual fee of \$9.95. Parents can also earn **life-time recurring affiliate commissions** simply by spreading the word about membership to other parents or when students tell their classmates, family, friends and others. In addition to students and parents having **FREE** access to the **"Owner Contact Service"**, membership also includes many other **Premium** benefits including the free **"Emergency Contact Code"** service, for helping schools quickly contact parents in the event of an emergency concerning a student. Parents can create their free **contact codes** online.
